

# IMS LIFECYCLE SERVICE

SERVICE &  
UPGRADES

SPARE  
PARTS

Throughout the entire life cycle of the IMS watertight door we aim to serve our clients in a professional way with both cost and safety in mind. Maintenance is crucial to ensure 100% operational capacity in case of an emergency and to avoid personnel hazards. IMS provides annual and 5-year service inspections conducted by our highly qualified and certified service engineers.

IMS believes in being available and provide immediate response to our customers throughout the lifetime of our products. We have qualified personnel performing service, maintenance and upgrading assignments all over the world. In addition, we maintain a large stock of spare parts for most of our doors. Non-inventoried equipment, we can manufacture immediately in-house.

## SERVICE AND UPGRADES

IMS dedicated service team have the experience to provide customer support for:

### NEW INSTALLATIONS

- **INSTALLATION SUPERVISION**  
IMS Lifecycle Service engineers have extensive experience with installation supervision and will assure that the installation work is done according to the customer's and IMS' specifications.
- **PRE-COMMISSIONING**  
IMS Lifecycle Service can assist with the electrical and mechanical installation, including final tuning and adjustments ensuring that doors are ready for commissioning.
- **COMMISSIONING**  
IMS Lifecycle Service can perform complete verification to ensure that the watertight sliding doors are working optimally before the vessel is taken into operation. This includes to check the complete installation, to ensure that every aspect is according to the specifications, rules & regulations.

### EXISTING INSTALLATIONS

- **INSPECTION**  
IMS can provide annual and 5-year inspection to ensure that the watertight doors are working safely. All functions and part of the system is tested.
- **SERVICE**  
IMS service team have the experience to perform any services of our watertight doors efficiently and professionally.
- **UPGRADES**  
IMS watertight doors have been installed in vessels for more than 40 years and are under constant development. IMS lifecycle service can provide technical and service support for watertight doors system upgrades, both mechanical and for automation systems.

### TRAINING

IMS Lifecycle Service offers training courses including theoretical and practical instructions of operation and maintenance of relevant IMS doors. Tailored courses are available upon request.

## SPARE PARTS

Our business is to satisfy our customer's needs for quality spare parts. We can supply genuine spare parts to all our water tight doors. Spares not in stock can immediately be manufactured in-house. If required, our target is to deliver spare parts worldwide within 48 hours.
